

SATISFIED CUSTOMERS... GUARANTEED!

"Deer had a highway to my apple trees, I put down Deer Scram and the highway is now closed!"
Larry A., Whitney Point, NY

"I placed an initial order a month back and have had grand success with keeping the deer out of my wife's flower/shrub beds. Her beds were repeatedly getting wiped out by the deer in our area. The problem is gone now that we have spread Deer Scram. A truly remarkable product. Hence, the repeat order...stocking up for future months.

Chris A., West Creek, NJ

"I purchased your product at the Southeastern Flower Show and this is the first year that my hostas have not been chewed to the ground! In fact, not a leaf has been touched, while most of my next door neighbor's tulips were eaten. I just finished spreading the remains of my pail around his newly planted hostas. I have shared your flyer with friends and neighbors. I want to reorder another 25lb. pail. Thanks!

Barbara B., Peachtree City, GA

Recommended by the National Home Gardening Club.

Deer Scram™ is an organic granular repellent with no chemicals or non-natural additives. Deer Scram™ also works well for rabbits and is guaranteed for both uses. The product has been tested and recommended by the National Home Gardening Club.

- Safe near Children & Pets

A GREEN Solution to Deer Damage!

America's Finest™ Granular Repellent

DEER SCRAM GRANULAR REPELLENT™

HOW DOES IT WORK? Deer Scram™ stimulates a strong fear-based response which works by emitting an odor that deer and rabbits associate with their dead kin. It repels the animals before they nibble on plants. Deer Scram Repellent has no unpleasant odor to humans, but discourages the unwanted animals from returning to the protected area.

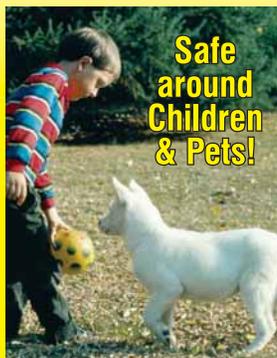

- Rain Resistant and can be used in every season... even under fresh snow!
- Organic, Natural & Safe for the environment!
- Deer Scram™ works well with rabbits too and is **GUARANTEED** for both uses!

IS IT SAFE TO USE AROUND MY PETS & VEGETABLE GARDENS?

Deer Scram™ contains no synthetics or chemicals, is non-toxic, biodegradable, and will not harm animals or the environment. Because Deer Scram™ is made from all natural and organic ingredients, it is completely suitable to use for organic gardening. We do recommend washing fruit and vegetables before eating.

HOW OFTEN DO I TREAT MY PLANTS AND TREES? Deer Scram™

should be applied every 30-45 days depending on weather conditions, for maximum protection. Because of its granulated formula, Deer Scram does not wash off in normal rain & is specifically designed to be long lasting. See Application Instructions.

**EASY TO USE!
NO MIXING - NO DILUTING!
LONG LASTING!**

Deer Scram™ shields ornamental trees, shrubs, garden plants & flowerbeds when used as directed. Just sprinkle Deer Scram's granular formula right out of the container!

GUARANTEED TO WORK!

Fast & Easy to Apply!

Deer Scram™ Granular Repellent can be applied as a protective perimeter barrier or it can be evenly spread over a garden bed or flowerbed. Deer Scram™ should be lightly re-applied immediately following a downpour or after periods of heavy or frequent rain.

For individual plants and bushes, sprinkle Deer Scram™ liberally around the plants and bushes to be protected.

For plots or flower beds, sprinkle liberally in a 16" strip surrounding the entire bed or plot. Use interior strips for larger plots. The application should be applied 18" from the edge of the plants and be heavy enough so as to visibly cover the ground around the plants & shrubs to be protected.

If you consider yourself to be in a highly aggressive deer environment, we suggest you increase the 16" strip to approx. 24" and/or increase the application amount.

A great winter barrier! Deer Scram™ works well even under fresh snow and can be applied on existing snow cover. Reapply every 90 days.

Stops Browsing Damage in ALL SEASONS!
