Net Weight: 10 lbs. (4.54 kg)

Nature's Essence SEP is a soluble extract of *Ascophyllum Nodosum* seaweed. **Nature's Essence SEP** is a supplement to a well-balanced nutrition program for crops.

Nature's Essence SEP is compatible with most other materials. To be safe, an initial jar test is always recommended when mixing **Nature's Essence SEP** with companion materials for the first time.

Nature's Essence SEP is a natural product with no preservatives. It should be stored in a cool, dry location out of direct sunlight. Dilute only as much powder as needed for each use.

Nature's Essence SEP is 100% water-soluble and is suitable for conventional foliar and irrigation applications.

Keep out of the reach of children

Notice: It is impossible to eliminate all risks associated with the use of this product. Crop injury, ineffectiveness, or other unintended consequences may result due to factors that are beyond the control of Organic Approach or the seller. The buyer or user shall assume all such risks.

Warranty Disclaimer: Organic Approach warrants this product conforms to the description on its label and is reasonably fit for the purposes described on its label. In no event shall Organic Approach or the seller be held liable for any incidental, consequential, or special damages resulting from the use or handling of this product. The exclusive remedy of the buyer or user for all claims shall be the return of the purchase price of the product

Description For Use:

Whenever possible, the total dosage of **Nature's Essence SEP** should be applied in several smaller-dose applications, not one large application. Do not spray or irrigate with **Nature's Essence SEP** more than once every 7 days. **Nature's Essence SEP** may be applied by itself or as an additive with most companion materials.

Nature's Essence SEP may be diluted in any volume of water; however, it is recommended that enough water be used to ensure complete leaf coverage. The addition of a biodegradable surfactant is recommended for maximum dispersal and leaf adherence.

Nature's Essence SEP should be used at the rate of 24 to 48 dry ounces per acre per year for turf, crops and plants. A minimum of 3 applications per year are recommended, but more frequent applications are preferable. Do not exceed 12 dry ounces of powder per acre in any one application.

To calculate the amount of **Nature's Essence SEP** to use in each application, take the total amount of **Nature's Essence SEP** to be used per acre per season or crop cycle (24 to 48 dry ounces), and divide it by the total number of foliar or irrigation applications intended to be made during the season.

For smaller areas or for spot spraying, add 1.5 teaspoons of powder per gallon of water or 1 dry ounce of powder per 10 gallons of water and spray plants to the point of run-off.
